

ENVIRONMENTAL POLICY

R W Services Contractors Ltd is a civil engineering, industrial and public works, drainage and road surfacing operation, we endeavour to minimise the environmental impact of our operations and reduce, wherever possible, the effects of noise, dust, disturbance and inconvenience to others.

R W Services Contractors Ltd is committed to working in partnership with customers and suppliers to offer the most environmentally effective and appropriate solutions. We are committed to improving environmental performance and the prevention of pollution. R W Services Contractors Ltd seeks to deal with suppliers and sub-contractors wherever possible that carry their own environmental codes of practice and we actively encourage the adoption of sound environmental principles.

- Conserving resources by reducing waste and minimising consumption of materials and energy. When waste is unavoidable, we are committed to reuse, then re-cycle and finally responsible disposal to minimise undesirable environmental effects.
- Regularly assessing the risks to the environment as part of our environmental management system.
- Ensuring that the business complies with all the relevant environmental protection legislation unless specifically exempt, and where appropriate, any of our customers' specific requirements.
- Actively encouraging employees to make suggestions on ways of improving environmental protection, conservation and pollution control.
- Reviewing and update this policy in line with any significant change in legislation, planned new developments or business activities.

The ISO 14001 system implemented by R W Services Contractors Limited, shall establish reviews of the system and its performance after installation, and present them to the company's Board of Directors, so that they can identify the area's requiring improvement / corrective action.

Objectives to improve environmental issues are set at regular management review meetings. Action plans are formulated and progress towards achievement is regularly monitored.

Qualified auditing techniques shall be applied to the system's processes and operations to determine its level of compliance and effectiveness.

This policy will be communicated to all those working for us on our behalf and will be available to the public through our website.
